Subject: Internship Offer – Software Engineer Intern (AI, Front End & Back End)

Dear Pranitha,

We are pleased to offer you the role of **Intern – Software Engineer (AI, Front End & Back End)** at AgenticPrompt.tech, a growing, nonprofit, community-led initiative focused on building open-source tools, learning platforms, and infrastructure to make ethical and accessible AI education available to all. Our mission is to empower students, educators, and communities by creating meaningful AI learning experiences rooted in collaboration, transparency, and social impact. We focus on practical AI education through real-world tools, including an AI-integrated LMS, interactive content delivery systems, and prompt engineering utilities designed for ethical AI use and development.

You will be part of a team developing the AI tools and backend systems that power our content delivery, community interaction, and student learning experience.

Training Repository: <https://github.com/saikrishnavadali05/SSSSO-RR-District-Skill-Development-Training>

Training Code name: CodeTrees (www.codetrees.org)

The content, tools, and platform that you build will directly support student training in collaboration with the Sathya Sai Organization. This internship is unpaid but offers valuable experience and mentorship.

Internship Details

- **Duration:** 22nd July 2025 to 19th September 2025 (2 Months)
- **Internship Type :** Remote

- **Commitment:** 4 hours per weekday

Role & Responsibilities

You will be contributing to:

- Building and maintaining the AI-Integrated LMS platform, including the Frontend (React), Backend (Django), and AI integration. You will also assist in integrating content into our Docusaurus-based website.
- Collaborating with the content and teaching teams
- Testing and deploying AI tools or interactive components
- Creating a seamless user experience for learners

Termination Policy

This internship may be terminated by either party with 3 days' written notice. In cases of misconduct, value violations, or consistent non-participation, termination may be immediate without the issuance of any completion certificate or recognition.

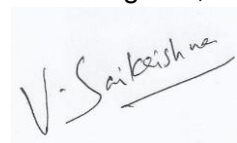

Important Notes

- AgenticPrompt.tech is a non-registered, community-driven initiative, and CodeTrees.org is its training project, developed in collaboration with the Sathya Sai Organization.
- The community is in early stages and will be registered once the AI Integrated LMS platform is ready. You are contributing to that platform.
- Interns shall treat all code and documentation as proprietary to AgenticPrompt.tech, and agree not to disclose or use them outside the scope of the internship without prior written permission. Developed systems may be open-sourced or used in live teaching.
- Collaboration, innovation, and ethical development are core values.
- The platform developed will be used by the Sathya Sai Organization for student training.

Acceptance

Please reply to this email with **“I accept the offer”** to confirm your participation in the internship. We look forward to your contributions in building a meaningful AI education platform.

Warm regards,

Sai Krishna Vadali
